Good morning, SITREP:

As most of you know the North East Marina is enjoyed each year by many locals. There has been concern about it closing for safety and financial reasons. Yesterday while in Harrisburg at a meeting in my office and in our Committee meeting. I discussed it in detail with the Fish and Boat Commission. In the meeting and following up with an email, I was informed. After an on-site scoping meeting by many departments involved in the issue. It was determined lake water levels have risen to a point of modified dredging allowing for boat activity in the Marina this season. The dredging will concentrate where sediment accumulates. The dredging material will need to remain on site for testing according to the DEP. The PFBC is working with the DEP and these stipulations. I think a shout out is in order for these departments, our local elected officials and all of the concerned boaters that came to our local meetings to fight to keep it open. Team work!

For now we have a Marina. Going forward we will need to secure funding and a way to keep it for years to come. WELL DONE to all involved caring enough to fight for it ! We Are America.
